Website Accessibility Statement for Private Entities pursuant to Article 3, paragraph 1, of Law No. 4 of 9 January 2004

Statement

Inox Meccanica S.p.A. is committed to making its website accessible in accordance with Law No. 4 of 9 January 2004. This accessibility statement applies to: https://inoxmeccanica.it/.

Compliance status:

Partially compliant
This website is partially compliant with the requirements set out in Annex A of standard UNI CEI EN 301549, owing to the non-compliances listed below.

Non-accessible content

The content listed below is not accessible for the following reason:
a. non-compliance with Law No. 4 of 9 January 2004:

- C.9.1.1.1 — Some non-text content presented to the user does not have a text alternative that serves the equivalent purpose;
- C.9.1.2.2 — Some prerecorded audio content lacks synchronized captions;
- C.9.1.2.3 — For some prerecorded multimedia, an alternative or audio description is not provided;
- C.9.1.2.4 — For some multimedia content, real-time captioning is not provided;
- C.9.1.3.1 — In some cases, information, structure or relationships conveyed through the presentation of pages cannot be programmatically determined (or are not available in text);
- C.9.1.3.4 — The display and operation of certain content depends on screen orientation, such as portrait or landscape, unless this is essential;
- C.9.1.4.1 — In some cases, colour alone has been used to identify a purpose or to distinguish information or a function;
- C.9.1.4.3 — The visual presentation of text and of images of text does not always meet the minimum contrast ratio required, except for the cases provided for by the regulation (e.g. logotypes);
- C.9.1.4.4 — Some text, with the exception of captions and images of text, cannot be resized up to 200 percent without the use of assistive technologies and without loss of content or functionality;
- C.9.1.4.5 — In some cases, images of text have been used instead of text alone, and they are neither customisable nor essential to the type of information being conveyed;
- C.9.1.4.10 — Content that does not require two-dimensional layout (such as data tables or maps) does not reflow when the user agent changes the size of the viewport;
- C.9.1.4.11 — For some essential components, including in their various states, the colour contrast with adjacent elements does not exceed a ratio of 3:1;
- C.9.1.4.12 — When text spacing is modified with regard to line height, paragraph spacing,

letter spacing or word spacing, some loss of information or content occurs;

- C.9.1.4.13 — In some cases, when content becomes visible and then hidden on pointer hover or keyboard focus, no mechanism is available to dismiss the additional content without moving pointer hover or keyboard focus, the pointer cannot be moved over the additional content without it disappearing, or the additional content does not remain visible until the hover or focus trigger is removed, the user dismisses it, or its information is no longer valid, except for some provided exceptions;
- C.9.2.1.1 — Some functionalities cannot be operated through a keyboard interface (or an analogous input interface);
- C.9.2.1.2 — Impediments to keyboard use: keyboard focus cannot be moved through a keyboard interface to a component of the page, and the user cannot be informed of the method for moving focus;
- C.9.2.2.2 — For some animations, blinking, scrolling or auto-updating information that starts automatically, lasts more than five seconds, or is presented in parallel with other content, no mechanism is provided to pause, stop or hide it;
- C.9.2.4.1 — A mechanism to bypass blocks of content that are repeated on multiple Web pages is missing;
- C.9.2.4.3 — On some Web pages that can be navigated sequentially and where the navigation sequence affects their meaning or operation, some focusable objects do not receive focus in an order that preserves meaning and operability;
- C.9.2.4.4 — The purpose of some links cannot be determined from the link text alone or from the link text together with its programmatically determined link context;
- C.9.2.4.6 — Headings and/or labels do not sufficiently clarify content or functionality;
- C.9.2.4.7 — On some interactive elements, the focus indicator is not visible;
- C.9.2.5.3 — For some user interface components with labels that include text or images of text, the name read out by assistive technologies does not contain the text that is presented visually;
- C.9.3.2.1 — When some user interface components receive focus, a change of context occurs;
- C.9.4.1.2 — In some cases, for user interface components (including form elements, links and components generated by scripts, etc.), the name, role, states, properties and values are not correctly set, or the user and their assistive technologies are not notified when these change;
- C.9.4.1.3 — In some cases, status messages are not presented to the user in a way that allows assistive technologies to interpret them without the focus having to be moved.

Preparation of this accessibility statement

This statement was prepared on 17/06/2026.

The assessment was carried out by a third party through objective and subjective analyses (see Article 3(1) of Commission Implementing Decision (EU) 2018/1523).

This statement was last reviewed on 17/06/2026, in accordance with the recommendation to periodically review (at least on an annual basis) the accuracy of the claims made in this accessibility statement.

Feedback and contact information

Despite our checks and our commitment, it is not always possible to guarantee the full accessibility of the website, and we welcome any feedback that may help us improve it for all categories of users.

To report difficulties in accessing the information and services provided, you can write to the email address info@inoxmeccanica.it.

How to submit reports to AgID

In the event of an unsatisfactory response or no response, within thirty days, to the notification or request, the data subject may submit a report to AgID via certified email (PEC), at the following address: protocollo@pec.agid.gov.it.

Website information

1. Website publication date: March 2001
2. Usability testing has been carried out: Yes
3. CMS used for the website: WordPress

Information about the organisation

1. Number of employees with disabilities working in the company: 1
2. Number of workstations for employees with disabilities: 3
